## ACTIVE SHOOTER EVENT QUICK REFERENCE GUIDE

An active shooter is an individual actively engaged in killing or attempting to kill people in a populated area.

- ▶ *Victims are selected at random.*
- ▶ *Event is unpredictable and evolves quickly.*
- ▶ *Knowing what to do can save lives.*

Father Gibbons and parishioner, John Elliff, recently attended a workshop requested by the Diocese and led by the FBI.

We are asked to share these Active Shooter Event Quick Reference Guides so all are prepared in case this RARE, horrific event would take place.

Please familiarize yourself with these guidelines.

## ACTIVE SHOOTER EVENTS

When an Active Shooter is in your vicinity, you must be prepared both mentally and physically to deal with the situation.

### You have three options:

#### 1 RUN

- Have an escape route and plan in mind.
- Leave your belongings behind.
- Evacuate regardless of whether others agree to follow.
- Help others escape, if possible.
- Do not attempt to move the wounded.
- Prevent others from entering an area where the active shooter may be.
- Keep your hands visible.
- Call 911 when you are safe.

#### 2 HIDE

- Hide in an area out of the shooter's view.
- Lock door or block entry to your hiding place.
- Silence your cell phone (including vibrate mode) and remain quiet.

#### FIGHT 3

- Fight as a last resort and only when your life is in imminent danger.
- Attempt to incapacitate the shooter.
- Act with as much physical aggression as possible.
- Improvise weapons or throw items at the active shooter.
- Commit to your actions... your life depends on it.

The first officers to arrive on scene will not stop to help the injured. Expect rescue teams to follow initial officers. These rescue teams will treat and remove the injured.

Once you have reached a safe location, you likely will be held in that area by law enforcement until the situation is under control and all witnesses have been identified and questioned. Do not leave the area until law enforcement authorities have instructed you to do so.

Life Line Screening goes beyond regular checkups to look inside your arteries for signs of plaque build-up

#### All 4 Screenings for \$149

##### Carotid Artery Disease:

An ultrasound is performed to screen the carotid arteries (a pair of blood vessels in the neck that deliver blood to your brain) for buildup of fatty plaque. This buildup, called atherosclerosis, is one of the leading causes of stroke.

##### Peripheral Arterial Disease (PAD):

An Ankle-Brachial Index (ABI) test is performed using blood pressure cuffs on the arms and legs. It is important to screen for PAD because it increases the risk of coronary artery disease, heart attack, or stroke.<sup>1</sup>

##### Abdominal Aortic Aneurysm (AAA):

An ultrasound is performed to screen the abdominal aorta for the presence of an enlargement or aneurysm. AAA can lead to a ruptured aortic artery, which is a life-threatening medical emergency.

##### Atrial Fibrillation:

A 6-lead electrocardiogram (EKG) is performed by placing sensors on the arms and legs to screen for Atrial Fibrillation. AFib can lead to blood clots, stroke, and heart failure, and other heart-related complications.<sup>2</sup>

We will be in your neighborhood soon **Monday, March 14th**

No single screening can detect all risk factors for all conditions, such as and including the presence of coronary artery disease.

<sup>2</sup> <https://www.heart.org/en/health-topics/atrial-fibrillation>

Screening results are provided to you in about 14 days. We direct all participants with abnormal results to take the report to their physician. Appropriate modification of risk factors (including high blood pressure, smoking, heart disease, diabetes and poor diet) is also necessary for cardiovascular disease prevention. Our screenings cannot detect all forms of stroke risk or cardiovascular disease. All tests are for screening purposes only. You should consult with your personal physician regarding your screening results. Price does not include any applicable review fees. Insurance Note: Life Line Screening does not participate in the Medicare program and the cost of our screening services is not covered or reimbursable by Medicare. Life Line Screening does not file insurance claims nor provide referrals to any physician's group or hospital. If you are unable to attend the screening for any reason whatsoever, we will issue a gift card for the full amount to be used by you, or anyone you choose, for future screening services.
